Story Decision

Selected Live Story

Headline:	Policy risk strength drives a broader risk-on move
Explanation:	Derived from 5 bullish and 0 bearish positions at 23:36 SGT. Story passed label check.
Market Alignment Score:	100
Forbidden Label Check Pass:	true
Forbidden Label Check Reason:	none

Story Policy Rules

- 1. Required ≥ 2 asset/sector confirmations for directional headline.
 - 2. Mixed tape declared truthfully when no clear winner.
 - 3. Publication story is immutable — preserved in history.
 - 4. LLM cannot unilaterally change the story — structured score decides.
 - 5. Forbidden internal labels (engine names, categories) are blocked dynamically.
-

Immutable Publication Story

Original Dominant Theme:	Policy risk strength drives a broader risk-on move
Canonical Narrative (first 500 chars):	Today's Full Immersive is mainly about Genesis Cryptocurrency. OTR published 139 rows today — 0 backed by fresh same-day sources, 7 carrying ongoing or recent context, 5 historical context, and 127 where the source date is still unconfirmed. OTR separated stronger pressure from watch-level evidence and locked the issue so every tab reads from the same source of truth.

Price Ledger

Per directive §13.1: publication prices are immutable. Latest resync prices come from committed run only.

Never falls back latestResyncPrice to publicationPrice while labelling it current.
